About us

For more than forty years, Antique Mirror has dedicated itself to researching and creating special products in the flat glass industry. All our sheets and mosaics are produced in the factory in Sovicille (Siena) using particular patented procedures and only artisan techniques. Each product, while similar in nature, is unique and unrepeatable. The Company distinguishes itself by attention and respect towards the environment by following an ecological set of rules and using renewable energy. Antique Mirror exports through agents and directly to retailers throughout the world.

Experience and technique, motivated by high levels of creativity and imagination, have produced an incredibly wide range of possibilities in the use of silvered and decorated flat glass.

What we do

Each product, always made for non external use, is specially and singularly treated on the surface in order to obtain a handmade article that cannot be compared with the uniformity of an industrial object.

SHEETS

We offer our customers a range of mirrors in over 50 different colors and textures. Our main product is the slab, that comes with a maximum size of 1250 x 2450 mm. We are aware that each design project is unique, therefore we offer the possibility to have our products **cut to size**. Our shades are numerous and peculiar: for this reason, it is always possible to contact us to receive a free set of samples.

TILES

Thanks to a revolutionary breakthrough technology we are able to deliver an innovative range of tiles, with a glossy or matt finish. It's possible to request a sample set for this product too.

DESIGN OBJECTS

The meeting between several designers and Antique Mirror has led to the creation of unique products in which the versatility of our mirrors is the protagonist: this line includes items such as storage boxes, pocket trays and coasters, up to elegant tiles and three-dimensional mirrors that can be used as art pieces.
